PROFESSIONAL SUMMARY

AI & ML undergraduate with strong academic performance (CGPA 9.64) and practical experience in Generative AI, Natural Language Processing, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and ERP systems. Experienced in building end-to-end AI products, integrating APIs, designing intelligent workflows, and developing full-stack applications. Passionate about solving real-world problems using machine learning and modern AI technologies.

EDUCATION

Dr. Akhilesh Das Gupta Institute of Professional Studies (GGSIPU), New Delhi

Bachelor of Technology in Artificial Intelligence & Machine Learning

2023 – 2027 | CGPA: 9.64

TECHNICAL SKILLS

Programming: Python, C/C++, JavaScript, SQL, HTML/CSS

AI/ML: TensorFlow, PyTorch, Hugging Face Transformers, Scikit-learn, NLP, Deep Learning, LLMs, RAG

Frameworks: Flask, FastAPI, Streamlit, LangChain, ReactJS, Node.js

Databases & Tools: MySQL, FAISS, Pinecone, Git, GitHub, VS Code

Integrations: Slack API, Google Sheets API, NewsAPI, NewsData.io API

ERP/CRM: Odoo ERP, CRM Systems

EXPERIENCE

Norx Cloud – Summer Training (Jun 2025 – Jul 2025)

Trainee – Odoo ERP

- Completed intensive training on Odoo Community Edition 18.0.
- Worked on CRM, Sales, Inventory, Accounting, Quotations, Billing, and Website Development modules.
- Participated in workflow automation and ERP customization activities.

Infosys Springboard 5.0 – Batch 3 (Dec 2024 – Feb 2025)

- Developed an AI-driven Supply Chain Disruption Predictor project.
- Worked with GPT, LLaMA, NLP pipelines, and API integrations.
- Gained hands-on exposure to TensorFlow, PyTorch, and Hugging Face ecosystems.

PROJECTS

VeriNews – Fake News Detection Web App (Jan 2024 – May 2024)

- Developed an AI-powered fake news detection platform using RoBERTa, Gemini AI, and NewsData.io API.
- Built a Flask-based full-stack application capable of aggregating live news from 50+ countries and 11 categories.
- Implemented dual-stage credibility scoring with AI-generated reasoning and recommendations.
- Added multilingual filtering, API fallback mechanisms, and responsive UI design.
- Tech Stack: Python, Flask, RoBERTa, Gemini AI, NewsData.io API.

AI-Driven Supply Chain Disruption Predictor & Inventory Optimization System (Dec 2024 – Feb 2025)

- Built a predictive analytics system for identifying supply-chain disruptions from global information sources.
- Implemented sentiment analysis and topic extraction using NLP techniques and transformer models.
- Integrated GPT, LLaMA, Slack API, and Google Sheets API for automated alerts and reporting.
- Developed inventory optimization workflows and ERP-oriented automation logic.
- Tech Stack: Python, TensorFlow, PyTorch, Hugging Face, Pandas, NumPy, Scikit-learn.

LLM RAG Observability & Monitoring Platform (Mar 2025 – Apr 2025)

- Designed a monitoring platform for RAG-based applications to track hallucinations and retrieval quality.
- Implemented vector retrieval workflows, embeddings tracking, and AI response tracing mechanisms.
- Created dashboards for debugging and improving Generative AI workflow transparency.
- Tech Stack: FastAPI, Streamlit, LangChain, OpenAI, Pinecone, Plotly.

AI Research Notes Assistant (RAG-Based) (Mar 2025 – Apr 2025)

- Developed a document-aware AI assistant using Retrieval-Augmented Generation.
- Implemented semantic search, contextual question answering, and automated summary generation.
- Built a clean Streamlit interface for document chat and exporting summaries.
- Tech Stack: Python, LangChain, OpenAI, FAISS, Streamlit, PyPDF2.

LEADERSHIP & RESPONSIBILITIES

Co-Lead (Content) – Kritrimdhi Society (Jan 2024 – Present)

- Created and published AI-focused content, articles, and outreach material.
- Contributed to technical awareness initiatives and community engagement activities.

Member – NSS Management Team (Oct 2023 – Present)

- Assisted in event management, student onboarding, and backend coordination.
- Supported students through technical workshops and community-driven initiatives.
